

AZALEA® TELEHEALTH

Secure, HIPAA-compliant videoconference and virtual care platform

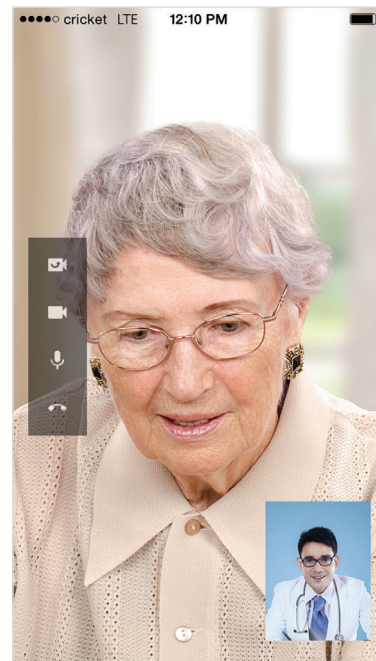

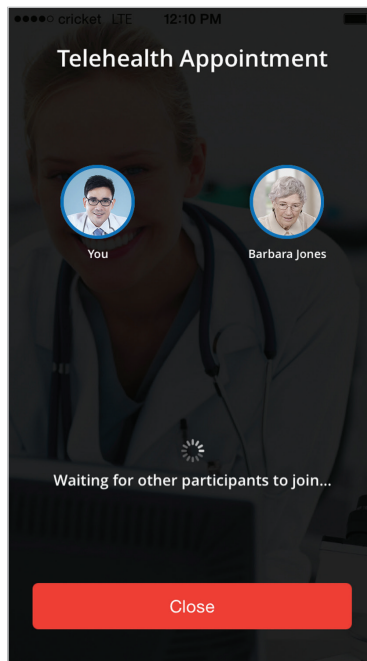

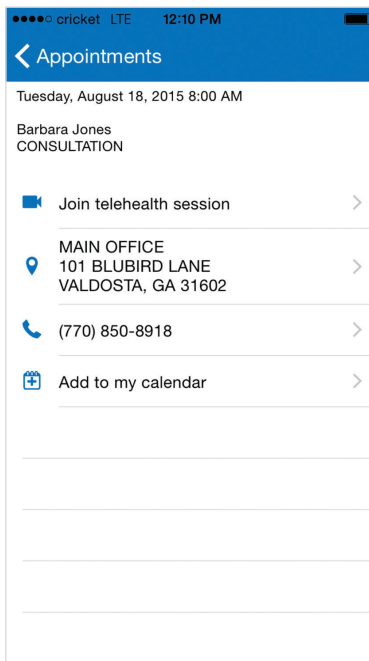

With the Azalea Health telehealth solution, providers can easily engage with patients or other care professionals using a secure, HIPAA-compliant video call on a mobile device from virtually anywhere. Azalea Health offers the only certified EHR with organically integrated telehealth functionality.

Since Azalea's telehealth solution is an integral part of our comprehensive health IT platform, it is fully integrated into all clinical, financial and administrative workflows. As part of Azalea's interoperable, cloud-based health IT platform, this includes the EHR as well as the patient portal, mobile apps and billing.

Telehealth has been well proven to improve patient engagement, increase accessibility to care and facilitate care coordination. Azalea's telehealth solution is a pillar in Azalea's virtual care strategy and allows care providers to capitalize on new telehealth and chronic care management reimbursement guidelines while participating in evolving payment and care delivery models.

Why telehealth, why now?

- **Increase accessibility** and convenience of patient consultations and physician collaborations.
- **Improve clinical operations** with integrated software and hardware workflows.
- **Reduce readmission** rates by providing better patient care and follow-up protocols.
- **Improve care coordination** with better communications.
- **Enhance patient engagement** and satisfaction levels.
- **Leverage higher reimbursement** rates for telehealth.
- **Benefit** from direct media streaming.
- **Works with** any smartphone or tablet.
- **Easy to deploy** virtual care strategy for any specialty.

INNOVATION. PARTNERSHIP. LEADERSHIP.
