

AMBULATORY SURGERY CENTERS

Comprehensive EHR, PM, and RCM for Surgery Center Management

Azalea Health's integrated electronic health record (EHR), practice management (PM), revenue cycle management (RCM) and medical billing services meets the needs of highly-specialized ambulatory surgery centers (ASCs) and specialty hospitals. With Azalea, you can seamlessly chart all clinical, administrative and financial information for both physicians and providers' services (professional) and ASC & charting (institutional), eliminating time-consuming manual processes and dual data entry while improving workflow and performance.

Our surgery management solution not only maximizes revenue, but allows physicians and ASC staff to concentrate on patient care rather than technology while still allowing access to timely, accurate data for better decision-making.

In addition to Azalea's highly scalable, certified EHR, the platform includes fully integrated practice management, patient portal, personal health records and telehealth functionality along with the AzaleaM™ mobile platform that's integrated with the Apple® Healthkit, and revenue cycle performance services.

Azalea Health's powerful, yet user-friendly technology delivers functionality and workflow that enhances performance and streamlines clinical, financial and administrative operations. Just ask our customers – Azalea has a customer retention rate of 99 percent.

Best of all, the certified Azalea® EHR and PM are FREE with Azalea® RCM medical billing services.

Why Choose Azalea Health®

- **Streamlined Solution** - Chart all clinical, financial and administrative information from one screen improving workflow and performance.
- **Customized Billing** - Seamlessly submit patient data and manage claims for both your professional 1500 and institutional UB-04 claims while eliminating dual data entry.
- **Efficient management of multiple facilities and providers** – Manage scheduling and billing for multiple surgery clinics and providers from one complete system.
- **"Code Check" Edits** – Integrated into the Azalea solution to help ASC staff with CCI edits for bundled surgeries, surgical modifiers and RVUs.
- **Collaborative Charting™** enables your team to work on the same chart simultaneously.
- **EHR Meaningful Use Dashboard** enables practices to monitor physicians' status.
- **Specialties** can create custom templates to meet diverse needs.
- **Interoperability services** help you securely and effectively share information.
- **Comprehensive reporting** capabilities for detailed, customized demographic and financial reports.
- **U.S. developed** with U.S.-based support and training.
- **Automatic updates** of CPT, HCPCS, ICD-9 and ICD-10 code sets at no additional charge.

Additional Physician-owned ASC features & benefits include:

- **Integrated Telehealth** increases accessibility and convenience by supporting patient consultations and collaborations between care providers.
- **Mobile mHealth® App** allows physicians & providers to step away from the computer and interact more with patients.
- **Azalea Patient Portal®** encourages stronger patient engagement and management.

INNOVATION. PARTNERSHIP. LEADERSHIP.
